MANAGEMENT DISCUSSION AND ANALYSIS REPORT**INDUSTRY STRUCTURE & DEVELOPMENT**

As recently assessed by Reserve Bank of India (RBI) in its annual monetary policy in the context of global economy, while near-term risks in the advanced economies started receding in the last quarter of FY'13, the improvement, however, is yet to fully transmit to economic activity which remains sluggish. Emerging and developing economies are in the process of a recovery. However, weak external demand and domestic bottlenecks continue to restrain investment in some of the major emerging economies. Inflation risks in emerging and developing economies appear contained, reacting negative output gaps and the recent softening of international crude and food prices.

Over the last decade, residential real estate market has witnessed many changes from experiencing unprecedented growth to negligible demand in the aftermath of the Financial crisis to moderate growth during the last couple of years. There was also shift in demand away from investors to actual end users. Newtime has been continuously recalibrating its strategy to deal with this changing business environment.

However, on a broader perspective, the Company remained steadfast on implementing the key elements of its long term business strategy. This included:

1. Efforts to create maximum value from its existing land bank by providing a diverse set of offerings to customers with greater emphasis on affordable housing.
2. Promoting excellence in project management and execution while maintaining a tight control on costs.
3. Introducing greater focus on each individual element of its 'other related businesses' like transmission towers manufacturing and facility management.

RBI's current assessment is that activity will remain subdued during the first half of this year with a modest pick-up in the second half. Growth in services and exports may remain sluggish too, given that global growth is unlikely to improve significantly from 2012. Accordingly, the Reserve Bank's baseline projection of GDP growth for 2013-14 is 5.7%.

In India, the loss of growth momentum that started in Fiscal 2012 extended further into Fiscal 2013. In Fiscal 2012, the Indian economy had registered a growth rate of 6.5%, down from 8.4% in Fiscal 2011. According to the RBI, the expected GDP growth rate for Fiscal 2013 is approximately 5%, lowest in the decade. This was mainly due to the protracted weakness in industrial activity aggravated by domestic supply bottlenecks, and slowdown in the services sector reflecting weak external demand.

On the inflation front, last year saw consistent easing of headline WPI inflation which came close to the Reserve Bank's tolerance threshold by March, 2013. However, the food price pressures and endemic supply constraints continue to persist suggesting a cautious approach by RBI in near to medium term. The Indian real estate sector plays a significant role in the country's economy.

Faced with this adversity, Newtime had to recalibrate its business strategy. The Company continues to focus on the consolidation of its operations, rationalization of businesses, cost control and better execution. During the second half of 2011-12 and much of 2012-13, the Company focused on executing these objectives and strengthening its fundamentals. Having succeeded in this endeavor, the Company is now poised to bring greater focus on its different businesses and ride the next wave of growth.

Key Developments in The Indian Real Estate Regulatory Framework**Draft Real Estate Bill**

The Draft Real Estate Bill seeks to regulate the real estate sector by establishing a real estate regulatory authority ("RERA") and an Appellate Tribunal. The bill aims at ensuring the sale of immovable properties in an efficient and transparent manner in the real estate sector. The Draft Real Estate Bill currently waits approval of the cabinet.

Draft Land Acquisition Bill

The Draft Land Acquisition Bill seeks to govern processes in relation to land acquisition in India and contains provisions relating to the compensation, rehabilitation and resettlement of persons affected by such acquisitions. The Draft Land Acquisition Bill was introduced in the Indian Parliament and is currently pending for approval.

NEWTIME INFRASTRUCTURE LIMITED

OPPORTUNITIES

1. Increasing Income Levels

The economic growth in India contributed to increasing income levels. This, combined with trends of higher urbanization, increase in working age population and nuclear families, created greater demand for housing. Much of the demand was backed by easier availability of housing finance that often converted people from living on rent to having their own housing asset.

2. Rising Foreign Direct Investment Levels

As the Foreign Institutional Investors have shown confidence in the country's construction sector and are showing up investments. This has led to an increase in new developments.

3. Growth in IT/ITES Sector

The primary growth driver of commercial real estate is the IT/ITES sector, which, is growing at a rapid pace.

4. Expansion in organized retail sector

Concept of specialized malls is also gaining popularity with auto malls, jewellery malls, furniture malls, and electronic malls anticipated to be the part of the sector in the future. Several other factors, such as rising incomes, evolving preferences, emergence of nuclear families, tax incentives and home loans at competitive rates have been responsible for the growth in demand for homes and residential construction.

5. Demand for newer avenues for entertainment

As the demand for more and more amusement parks is growing, development of same needs to take place. In accordance with the 'Entertainment City' in Noida and 'Adventure Island' in Rohini, New Delhi some projects are underway in this newer avenue.

6. Rising Urbanization

According to the United Nations Population Fund (UNFPA), India is getting urbanized at a faster rate than the rest of the world and by 2030 more than 40.7 per cent of the country's population would be living in urban areas. India's cities have been the driving force in shaping India's socio-economic profile. Urban areas which constitute only 28.7 per cent of the population have been a major contributor to the GDP with a major share of industry and almost the entire services sector concentrated in the urban agglomerations. India's 'Mega-Cities' of Mumbai and Delhi

would be the world's 2nd and 3rd largest cities by 2015. With a rapid influx of migrants in these cities there is a corresponding increase in the demand for space. Rapid urbanization is fostering real estate growth in India.

7. Hotel Industry

Despite the temporary slow down that the Indian hospitality industry faced due to the global economic crisis, India is still one of the world's fastest growing hotel markets.

8. Supply Push Factors

Certain Factors like, Policy and Regulatory factors providing with 100% FDI's, simplification of urban development guidelines, infrastructural support and development by government, some fiscal benefits to developers, positive outlook of global investors etc have also increased the opportunities at real estate sector.

SEGMENT WISE PERFORMANCE

The Company deals in only one segment i.e. Real Estate. Therefore, it is not required to give segment wise performance.

BUSINESS AND FINANCIAL PERFORMANCE & OUTLOOK

Your Company is now seeking to concentrate on certain key geographic markets, and to achieve a suitable product and price combination in these markets. Your Company is also investing in the development of supporting urban infrastructure in certain select, strategic locations to ensure the high quality of developments. Your Company's current strategy is aimed at developing its core business, rationalizing its costs and reducing its levels of indebtedness. However, as your Company seeks to focus on its core business, it faces several challenges, including an uncertain economic, regulatory and taxation environment. Your Company believes that demand conditions in the real estate sector are exhibiting early signs of improvement, and signs of declining interest rates as well as renewed activity in the lending and public capital markets are expected to ease funding pressures. As your Company continues to build on its core business of real estate development and leasing, your Company believes that it is well placed to achieve its targets of reducing its overall indebtedness, executing its real estate development and leasing operations and taking advantage of a potential revival in economic growth and its resultant positive effects on the real estate sector. As your Company continues to implement its strategies, its financial condition at the end of Fiscal 2013 reflects the on-going effect of the above economic and business factors.

The real estate sector is also likely to get a boost from Real Estate Mutual Funds (REMFs) and Real Estate Investment Trust (REITs). REITs alone would hold a market size of US\$ 70 billion of the total real estate market as it is gaining ground in countries like India.

Almost 80% of the real estate developed in India is residential space, the rest comprising of offices, shopping malls, hotels and hospitals. According to the Tenth Five-Year Plan, there is a shortage of 22.4 million dwelling units. Thus over the next 10 to 15 years 80 to 90 million housing dwelling units will have to be constructed with a majority of them catering to middle and lower-income groups.

Expansions are required to be made in developing Shopping Complexes. Accordingly over 100 malls are projected to open in India in the coming 2-3 years.

Foreign institutional Investors have also shown confidence in the country's construction and are showing up investments in India. This is a positive sign and open new areas of growth and development.

The Company intends to expedite execution and deliveries wherever backlogs exist and heighten the construction activity based on visibility of pre-leasing. The strategic locations of company's land resource of office development and excellent client relationships over the years will enable it to increase construction activity as and when the markets improve and corporates revive their expansion plans.

RISKS & CONCERNS

- **Changes in tax, tariff or fiscal policies:** Imposition of additional taxes and levies designed to limit the use of construction products could adversely affect the demand for the infrastructure industry. Changes in corporate and other taxation policies, as well as changes in export and other incentives given by various governments, or import or tariff policies could also adversely affect the Company's financial results.

NEWTIME INFRASTRUCTURE LIMITED

- **Political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages / prices, epidemics, labour strikes:**

The Company is subject to various risks associated with conducting the business both within and outside the domestic market and the operations may be subject to political instability, wars, terrorism, regional and / or multinational conflicts, natural disasters, fuel shortages, epidemics and labor strikes.

- **Input Costs:** Input costs on account of commodities and petroleum products have risen over the year and resulted in higher input costs. While the Company continues to pursue cost reduction initiatives, increases in commodity prices and other costs resulting from inflationary pressures, could impact the Company's profitability to the extent that the same are not absorbed by the market through price increases and/or could have a negative impact on the demand.
- **Global Competition:** India is the [second fastest growing economy] in the world and continues to be an attractive destination for the global real estate players. To counter the threat of growing global competition, the Company continues to intensify its drive to improve quality and product offerings, while maintaining its low cost product development and sourcing advantage.
- **Changing Macro Environment:-**The Indian economy is slowing down is very evident. Estimates from the Central Statistical Organization (CSO), Government of India (Gol) suggest that real GDP growth reduced further from 6.2% in 2011-12 to 5% in 2012-13. This is the lowest growth recorded in the last decade and far below the 8%-9% annual growth rates envisaged for the economy in the long term plans of the Gol. What is even more worrisome is the fact that over the last 10 quarters the situation has gotten progressively worse.
- **Rising Prices:-**Specter of rising prices in real estate may need to be regulated as well, but if the industry would do it by itself there might not be the need for state government to step into the regulation aspect as regards to pricing levels.
- **Power Shortage:-**Indian economy majorly faces with the shortage of Power supply, which directly or indirectly affects the construction, etc and unnecessary delays the completion of the Project

The main areas of concerns are:

- Restrictive governmental policies relating to Real Estate.
- Limited Investment from the Organized Sector
- Volatile Global Environment
- Rising cost
- High interest rate
- Rising Inflation
- Low accessibility and unavailability of facilities and services

Management is responsible for the preparation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance and the Consolidated Cash Flow Statement of the Company in accordance with accounting principles generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

Based on our audit and to the best of our information and according to the explanations given to us,

And consideration of report of the other auditors on separate financial statements, in our opinion the consolidated financial statements give true and fair view in conformity with the accounting principles generally accepted in India.
